

**CASCADING BIRD MOBILE**

Cut out the five various sized birds. Poke a tiny hole in the top of the middle of each bird. This is where you will thread the yarn through. Cut a piece of yarn about three feet long. Tie a thick knot at one end of the yarn. Thread the smallest bird through the other end of the yarn and push it down to the knot. Continue this for all birds. When the last bird, the largest, has been threaded onto the yarn, tie a large loop at the end. Get two sticks and the yarn in a criss-cross until secure. Attached string of birds to the sticks to complete.
